

Monopolar Needle Electrode

Friendship Disposable Monopolar Needle Electrodes are designed for use with standard EMG equipment to stimulate and measure biopotential signals, EMG and nerve potential. The tip is coated and designed to be ultra-sharp to reduce any discomfort for the patient. Friendship Monopolar Needle Electrodes come in different sizes – all with a color-coded hub to make it easy to find the right size.

- Individually packaged
- Available in boxes of 25
- Sterile
- Single patient use only
